

Pugh Chart

Metrics:

- Force exerted when retrieving the snack (i.e. to open flap, drawer etc.) should not exceed 22N.
- Products of size 180 x 100 x 94 mm must be able to be retrieved with ease and without any damage to the product.
- An anti-theft system must be implemented such that no objects with a diameter larger than 12mm and length of 328mm can enter the storage area of the machine to dislodge a product
- Hand flexion or extension during the process of retrieving the snack

	Snack Chute	Snack Sack	Garage door	Wave n' take
Force (N)		Worse	Worse	Same
Product damage		Better	Better	Better
Anti theft preservation		Same	Worse	Same
Hand flexion / extension		Worse	Worse	Same
